

AWS Project Plan

ParkMe

Project Summary

A mobile and web application that allows users to book and manage parking slots in real-time, providing a seamless and convenient parking experience.

Development Phases

Phase 1: Research and Planning — Week 1-2

Conduct market research, define project scope, and create a detailed project plan.

Phase 2: Backend Development — Week 3-4

Design and implement the backend infrastructure using AWS services such as Lambda, API Gateway, DynamoDB, and S3 to manage user data, parking slot availability, and booking requests.

Phase 3: Frontend Development — Week 5-6

Develop a user-friendly mobile and web application using a framework such as React or Angular, integrating with the backend API to provide a seamless user experience.

Phase 4: Testing and Deployment — Week 7-8

Perform thorough testing of the application, deploy to production using AWS services such as CloudFront and EC2, and set up monitoring and logging using AWS CloudWatch.

AWS Services & Monthly Cost Breakdown

Service	Free Tier	Monthly Cost
Lambda	Yes	FREE
API Gateway	No	\$3.50
DynamoDB	Yes	FREE
S3	Yes	\$0.02
CloudFront	Yes	FREE
EC2	No	\$8.50
Cognito	Yes	FREE
SNS	Yes	FREE

Free Tier Savings: ~\$12/mo

Total Estimated Monthly Cost: \$12.02
